10-470	Router Boss 470* All Router Boss machines provide an unprecedented level of control and versatility in routing wood. Because you are not constrained in the bits you can use or cuts you can make, you can focus more on the creative and aesthetic aspects of woodworking. This precision-built machine has a 47" sliding bar and an extra wide 36" work holding capacity. Requires 85" wide work space.	\$825	
10-420	Router Boss 420* Same great features as Router Boss 470, except with 42" sliding bar and 31" work holding capacity. Requires 75" wide work space.	\$795	
10-360	Router Boss 360* Same great features as Router Boss 470, except with 36" sliding bar and 25" work holding capacity. More compact, but still offers exceptional capacity. Requires 63" wide work space.	\$760	
12-290	Digital Scale Option A "built in" electronic digital scale that measures movement of sliding bar and indicates cut locations with extreme accuracy. It has a separate top-mounted LCD display and operates for full travel of the sliding bar. Large display reads in mm or both decimal inch and fractions. The reader beam permanently mounts to back of sliding bar and the scale does not have to be removed when switching operations.	\$145/ 360 machine \$150/ 420 machine \$155/ 470 machine	
12-100	Special: Accessory Package Deal Save 10% with this bundle of popular Router Boss accessories. Includes Mortise Table Kit, Riser Plate with Fence Kit, Precision Stop, Double Feather Board and 2 Universal Track Clamps.	\$345	
12-240	Plunge Assist Kit Makes depthing of the router a one-handed operation, leaving your other hand free to turn the crank that moves sliding bar and positions the cut. Plunge assist bars provide both enhanced plunge control and a convenient handle for guiding and positioning the router. Universal mount includes a transition plate to adapt other routers to fit our router plate.	\$45/ DeWalt 625 \$52/ Universal	
12-250	Mortise Table Kit 31" by 7" adjustable height/tilt t-track platform that mounts 2 ways on sliding bar that feeds wood through cutter. The t-track mounts horizontal for cutting on face or edge of board. Mounts vertical for cutting on end of board or at an angle. Cutout in t-track allows both a horizontal (mortise) board and a vertical (mating tenon) board to be clamped at same time and cut with a single setup.	\$240	
12-260	Riser Plate with Fence Kit 3/4" MDF riser plate that increases depth of cut plus a feather board, hog bristle brush and an attachable pair of fences with adjustable opening that together provide router table capability for hand-feeding work piece against bit (profiling).	\$60	
12-220	Precision Stop A micro-adjustable stop that rides in t-tracks of our router plate guide rails. A quarter turn of the adjustment head equals 1/4mm or 1/100". Provides very precise adjustment to fit tenons and other joints.	\$33	
12-280	Depth Gauge Kit 8" and 10" electronic digital scales with mm, decimal inch and fractional inch LCD display. Can be mounted either to measure router plunge depth (DeWalt 625 only) or router cross-cut position from a starting zero position. All required hardware included.	\$32/ 8" or 10"	

* Demonstration videos, user manual and reviews available online at www.chipsfly.com/instructionals

12-300	Multi-angle Work Holder Kit 15" wide work holder that can hold wood at a single or compound angle for mortising, tenoning, and other operations. Cuts angled tenons for chair construction. Rapid adjustment friction clamps securely hold a work piece up to 4" thick either horizontally, vertically, at a left/right miter angle or at compound angles up to 45-degrees.	\$200	
13-625	DeWalt 625 Router This router fits the Router Boss perfectly. It has long been the industry standard in heavy-duty plunge routers. It is solidly made, 3-HP, soft start and variable speed. It has a smooth plunging action that works well with our plunge assist bar. The Router Boss router plate is pre-drilled for this router. Order our 13-900 transition plate (\$10) to adapt other routers to fit our router plate.	\$295	
13-195	XL Quick-Change Chuck Changing a router bit with the router upright and while holding a bit is a three-handed operation. Our quick-change chuck makes it a two-handed operation and allows you to change bits in 5-10 seconds with a simple turn of a 5/32" T-handle Allen wrench. Designed specifically for Router Boss, this chuck adds an additional 5/8" of plunge depth.	\$68	
17-130	3-Piece Carbide Spiral Set Made in USA from solid carbide, this 3-piece upcut spiral straight bit set (1/4", 3/8" and 1/2") with extra long 1.5" and 2" cutting lengths is best for cutting tenons, mortises and dovetail pins. All have 1/2" shanks with 2" shank length.	\$120	
17-145	5-Piece Premium Dovetail Set Made in USA from CPM M4 steel for exceptional wear resistance and high-impact toughness. Our maximum performance dovetail bits for natural wood. All have extra long 1/2" shanks with cutting lengths from 1/2" to 15/16". Narrow necks provide a hand-cut look.	\$125	
17-200	Vertical Panel Raiser Bits Made in Taiwan with premium carbide. Cutter diameter 1 1/2", depth of cut (profile width) 1 5/8", 1/2" shank with an extra long 2" shank length. By raising or lowering bit you can adjust profile from 1" to 1 1/2" of reveal.	\$35/ Straight/Cove/ or Ogee \$100/ 3 pc set	
12-230	Gauge Bars 3/4" wide brass gauge bars cut from key stock in 2 1/2" lengths. Set includes 1/16", 1/8", 1/4", 3/8" and 1/2" thick bars. Use gauge bars to eliminate measuring when setting stops.	\$20	

Woodworking is fun and rewarding. Router Boss makes it easy to unleash your creativity. To order:
